SUMMARY

Skilled in Python with basic understanding of Java, acquired through training and academic projects. Ready to apply these skills to tackle new challenges and explore different areas. Perform well under pressure, self-motivated, and effective at managing workload.

ACHIEVEMENTS

CONDUCTING POWER BI WORKSHOP FOR OUR CSE BRANCH STUDENTS.

Getting certified in Power BI helped me teach my classmates about it through a workshop our college organized.

HEAD OF DATA COLLECTION TEAM FOR MAGAZINE DRAFTING COMMITTEE IN OUR COLLEGE

As team leader, I gathered essential information to create the college magazine. This experience improved my communication, leadership, and time management skills.

PROJECTS

TEMPLE DATABASE MANAGEMENT

This project is a web-based temple management system developed using Flask and MySQL. It allows users to register, login, and perform various operations like viewing temple details, donations, and visitor records. The system also includes admin functionalities for data management and access control.

MOVIE DATABASE ANALYSIS

This project allows management of movie databases, offering functions for adding, searching, sorting, and analyzing movie data by genre, language, and country with insightful visualizations.

SMART CITY MANAGEMENT

This project is developed using Java. Its assists individuals in discovering information about educational institutions, hospitals, and popular tourist destinations within their city.
